

**NEW PYRETHROID
FORMULATION**
Approved for fabric of the building

***K-Obiol* EC 25**

ASSURED PROTECTION

K-OBIOL® EC25

PYRETHROID FORMULATION

K-Obiol® EC25 is a modern pyrethroid formulation containing Deltamethrin, synergised with piperonyl butoxide for the control of all stored product insects known to infest grain and pulses. This pyrethroid formulation is an ideal alternative to organo-phosphorus formulations.

NO WITH-HOLDING PERIOD

The Maximum Residue Limit (MRL) nominated for deltamethrin is 2mg/kg in grain. When K-Obiol® EC25 is applied at recommended rate, the residue level (0.25mg/kg) will be 8 times lower than the MRL.

On finished, manufactured product, flour and bread: no residues over the MRL are found as deltamethrin does not significantly penetrate the grain but remains on the bran.

Within hard wheat manufactured products, semolina and pasta: no residues over the MRL of deltamethrin were detected.

In malting: no residues over the MRL of deltamethrin is found in wort or beer, and therefore has no effect on beer.

UP TO 12 MONTHS CONTROL (ADMIXTURE)

K-Obiol® EC25 is a liquid grain protectant for the control of stored product pests including crawling insects such as grain weevils, flour beetles, grain borers, sawtoothed grain beetles, bean weevils and flying insects such as warehouse moths, rice moths, indian meal moths and grain moths.

Add 1 litre of K-Obiol® EC25 to 99 litres of water and apply this to 100 tonnes of grain for protection up to 12 months.

FABRIC OF THE BUILDING TREATMENT (PRE-HARVEST)

K-Obiol® EC 25 can be applied to the fabric of the building - Add up to 60ml of K-Obiol® EC25 to 5 litres of water. Refer to the label for different porous and non-porous application rates. This fabric treatment provides 2 months protection.

ALWAYS READ THE LABEL. USE PESTICIDES SAFELY. Accepted for use by BRI and NABIM. K-Obiol® (MAPP 13573) contains deltamethrin 25g/L and piperonyl butoxide 225g/L. K-Obiol® is a trademark of Bayer.
