

# Drat®

## Effective Rat control

- Controls all major Rat species
- Highly flexible liquid concentrate
- Very low risk to non target species

### How it works

Drat® allows the user to formulate their own baits for more effective, targeted control.

Rodents taking Drat® baits usually die within 7 days.

Drat® contains chlorophacinone, a powerful single-dose anticoagulant.

### Ease of use

Drat® bait can be made as and when required and is economical in use.

Liquid concentrate can be mixed with a variety of bait bases to eliminate bait shyness.

Drat® is registered for internal and external protected baiting points.

Poisoning of non-targeted species is unlikely with Drat®, when used following label directions.

### Areas of Use

Drat® is a liquid concentrate which allows the user to formulate their own baits for more effective, targeted control.

Set individual stations near rat holes or known runs, using about 57g of mixed bait.

Situations: Indoors and outdoors

### Pests Controlled

Drat® controls all major Rat species.

### Health and Safety

Health and safety equipment.

### Application Rate

#### Rat Control Program

How to eradicate Rat infestations in 3-4 weeks:

1. Clean infested areas and block access holes.
2. Seek out feeding traces and droppings indicating the presence of rats.
3. Select baiting points as close as possible to infested areas. Baiting points should be spaced 10m apart at most. Leave approximately 57g / baiting point.
4. Inspect baiting points at intervals of 2 to 3 days, replenish as necessary and remove unused baits after 7 to 10 days.

#### Precautions

Protect baits from prevailing weather.

Do not prepare or place baits where food, feed or water could be contaminated (except when used in sewers).

Prevent access to bait by children, birds and non-target animals (particularly dogs, cats and pigs).

### USE BIOCIDES SAFELY

#### ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE

Drat® contains chlorophacinone 2.5g/L (0.29% w/w). HSE 6741. Drat® is a registered trademark of Bayer.
