

# Quick Bayt®

Dead flies dead quick

- Kills flies fast
- Up to 6 weeks control
- Easy and convenient to use
- Cost effective fly control

### Kills flies fast

Flies die within minutes of contact. Paint on bait formulation for rapid results. Unique, highly visible red colour containing fly pheromone muscalure.

### Up to 6 weeks control

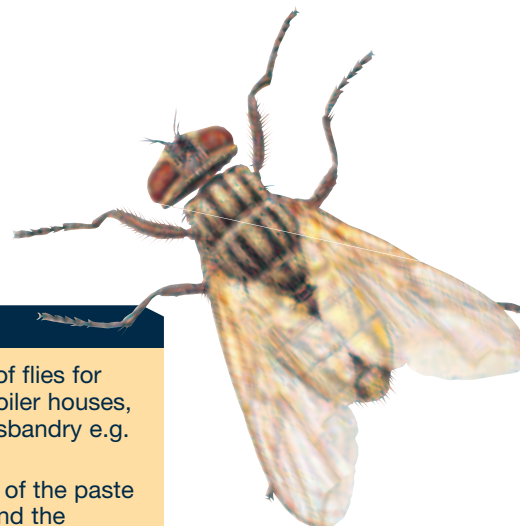

Up to 6 weeks efficacy in the field. New active ingredient Imidacloprid provides a unique mode of action for optimal fly control. Quick Bayt® Controls flies that exhibit resistance to other insecticides.

### Easy and convenient to use

Quick Bayt® can be applied in the presence of animals in areas inaccessible to them. Granules mixed with water form a paste that can easily be applied with a paint roller or brush.

**Quick Bayt®**

### Areas of Use

Quick Bayt® is an insecticidal bait for the control of flies for use in animal unit or agricultural buildings, e.g. broiler houses, livestock barns, caged layer houses and small husbandry e.g. kennels etc.

Best results will be obtained when small amounts of the paste are applied in many locations, concentrating around the preferred resting sites of flies. Paint the bait in areas inaccessible to food producing animals, children and pets, and where foodstuffs will not become contaminated.

### Insects Controlled

Quick Bayt® is suitable for the control of houseflies.

### Health and Safety

Health and safety equipment.

### Application Rate

Mix the appropriate quantity of Quick Bayt® with the required water volume as follows:

| Area to be treated  | Quick Bayt  | Water   |
|---------------------|---|---------|
| 175 m <sup>2</sup>  | 350 g  | 175 ml  |
| 350 m <sup>2</sup>  | 700 g  | 350 ml  |
| 1000 m <sup>2</sup> | 2 Kg   | 1 litre |

### USE BIOCIDES SAFELY
